Recruitment Overview

Odoo 19 Enterprise Â· Recruitment

The Recruitment module manages the full hiring cycle â€” from job posting to offer letter â€” with a Kanban pipeline for each open position.

1 What Recruitment does

Recruitment

Recruitment organises hiring into visual pipelines â€” one pipeline per job position. Candidates (called Applications) move through stages: New Application â†’ Initial Screening â†’ First Interview â†’ Second Interview â†’ Contract Proposed â†’ Contract Signed. At each stage you can schedule activities, send emails, add notes, and rate the candidate. When hired, a click creates the employee record from the application data.
