

01

Website Overview

Odoo 19 Enterprise · Website

The Website module is a full website builder integrated into Odoo – create and manage your company website with drag-and-drop editing, no coding needed.

1 What Website does

Website

Website provides a drag-and-drop page builder for your company website. Every page is editable directly in the browser – click Edit, drag blocks, type content, and publish. Pages connect to all other Odoo modules: your product catalogue powers the shop, job positions appear on the careers page, events appear on the events page, blog posts connect to Email Marketing. One platform for website and business operations.
